

Abdul Aziz V I

UI/UX & Product Designer (Data, SaaS, POS & Enterprise Systems)

Dubai-based UI/UX Designer and Framer Developer with **4 years of experience** delivering pixel-perfect digital products for UAE clients, SaaS platforms, and enterprise applications. Experienced in the full design-to-delivery cycle from discovery research and Figma prototyping to Framer web development and React.js frontend implementation. Combines UAE market experience with AI-accelerated workflows (Figma AI, GitHub Copilot, Cursor AI, v0 by Vercel) and data-informed design (Hotjar, GA4) to deliver fast, high-quality, conversion-focused interfaces for e-commerce, fintech, F&B; and enterprise clients across the UAE and broader GCC.

Skills & Expertise

Design Tools	• Figma, • Framer, • Adobe XD, • Protopie, • Sketch, • Invision, • Miro, • FigJam, • Zeplin, • Principle, • Adobe Illustrator, • Adobe Photoshop,
UX Process	• User Research, • Usability Testing, • A/B Testing, • Heuristic Evaluation, • Journey Mapping, • Information Architecture, • User Personas, • Design Thinking, • UX Writing, • Stakeholder Presentations,
UI & Interaction	• Wireframing, • High-Fidelity Prototyping, • Interaction Design, • Motion Design, • WCAG 2.1 / 2.2, • Design Tokens, • Component Libraries, • Design Systems, • Mobile-First Design, • Responsive Web Design,
Frontend Development	• React.js, • Tailwind CSS • JavaScript (ES6+) • HTML 5 • CSS 3 • Framer Motion • Lottie • Framer Web Dev • Framer CMS • Bootstrap • Git / GitHub
Creative	• logo Design • Brand Identity • Packaging Design • Social Media Graphics • Marketing Collateral • Brochure / Catalog Design
Analytics	• Hotjar, • Google Analytics • Maze • Amplitude • A/B Testing • Conversation Rate Optimization
AI ~ Design / Dev	• Figma Make • Cursor AI • v0 by Vercel • Framer Workshop • Adobe Firefly • Midjourney • Galileo AI • Relume AI • Dall E • Uizard • GitHub Copilot • Cursor AI • Claude Code

Professional Experience

Framer Developer / Designer	Sept 2025 - May 2026
Jogaram Group - (Dubai, UAE)	

- Designed and developed end-to-end Framer websites for Dubai-based business clients across retail, services, and hospitality from discovery and wireframing to live Framer deployment with CMS integration.
- Delivered high-converting, mobile-first web experiences with scroll-based animations and micro-interactions optimised for UAE's mobile-dominant user behaviour.
- Used Hotjar heatmaps and Google Analytics (GA4) to track user behaviour, identify conversion drop-offs, and iterate on design for measurable engagement improvements.
- Produced full brand identity systems logo, packaging design, brochure, poster design, social media graphics, and website visuals — tailored to Dubai market aesthetics.
- Collaborated directly with UAE-based clients to translate brand guidelines and business goals into pixel-perfect, multi-device deliverables with fast turnaround times.
- Leveraged AI design tools (Figma AI, Adobe Firefly, ChatGPT) to accelerate creative ideation, copy generation, and visual concept validation for client projects.

Warely Technologies - (India)

- Designed end-to-end UI/UX for B2B and B2C SaaS products serving F&B;; retail, and enterprise clients — including POS systems, Kiosk & Table Ordering, CRM dashboards, HRMS, and Queue Management — with UX patterns relevant to the UAE hospitality and F&B; sector.
- Led UX research process using user interviews, heuristic evaluation, A/B testing, and Hotjar analytics to drive measurable improvements in task completion and user retention.
- Built a shared Figma design system and reusable component library adopted across 4+ SaaS products, reducing design-to-development handoff time by 30% and enabling faster product iterations.
- Developed React.js and Tailwind CSS UI components, owning the design-to-code pipeline and producing Storybook documentation for seamless developer collaboration.
- Created motion design and micro-animations with Framer Motion and Lottie, enhancing product quality and user delight across all interfaces.
- Applied WCAG 2.1 accessibility standards across all products and ran iterative usability testing with stakeholders to continuously improve product experiences.

Triton Tech Labs - (India)

- Designed responsive web and mobile interfaces for healthcare technology, digital platforms, and agency clients — managing the complete UX lifecycle from research and wireframing to final delivery.
- Conducted user research, usability testing, and wireframing to validate design decisions and ensure product experiences met real user needs.
- Developed React.js and Tailwind CSS frontend components from Figma designs, delivering pixel-perfect, responsive, and cross-browser-compatible code.
- Built and maintained design systems and reusable component libraries to ensure visual consistency and reduce design debt across client projects.
- Delivered brand identity, logos, brochures, and digital marketing assets for clients across healthcare, retail, and professional services industries.

Front End Web Dev (React.js)

Feb 2026 - Present

Udemy

Key Achievements

Aug 2022 - Mar 2024

- Direct UAE client experience designed and shipped Framer websites for Dubai-based businesses with Hotjar + GA4 tracking and measurable engagement results.
- Reduced design-to-development handoff time by 30% via a Figma design system spanning 4+ SaaS products directly applicable to UAE product teams.
- Designer-developer hybrid built React.js + Tailwind CSS components at two companies, bridging design and engineering in the way UAE tech companies increasingly require.
- Delivered cross-industry projects across F&B;; hospitality, retail, fintech, and enterprise all high-demand sectors in the UAE job market.
